Summer, sun and S2500i

Summer has come to stay here in Sweden and vacation is just around the corner. But, production is still up and running and we are installing new automations every day!

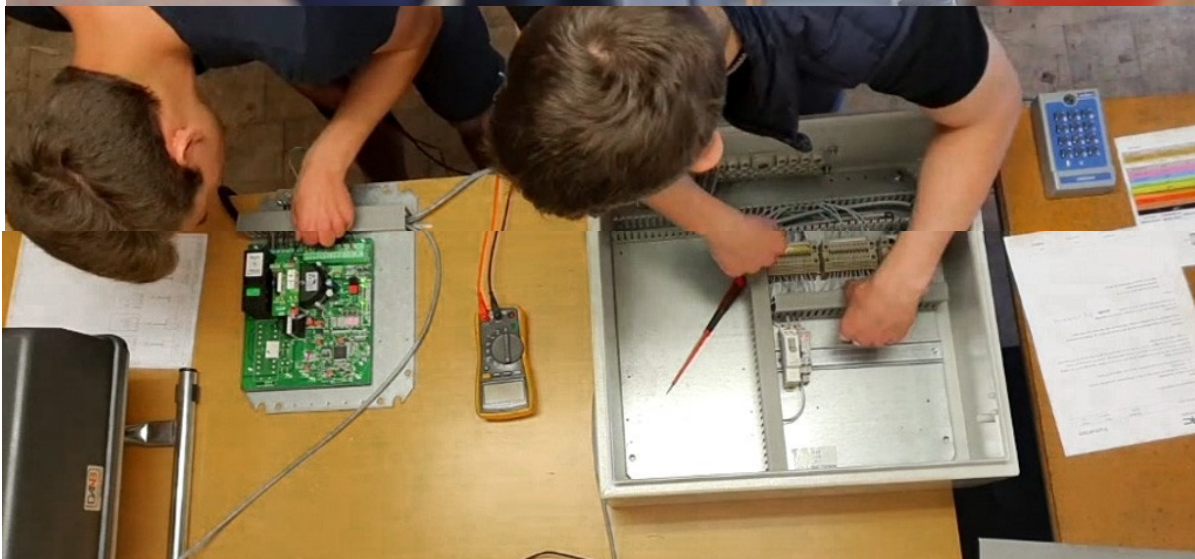

Most of the time, our products are supposed to work without being seen or noticed, but there are some exceptions. Sometimes you want a cover in a really eye-catching colour or to be notified that the gate is opening. In both cases S2500i is the obvious choice for your family gate.

A discreet grey was chosen for the installation in this suburban area, but the cover can be coated in a variety of colors. The flashing light-function will come with the automation no matter which colour you choose!

The Winners!

As an important part of our cooperation with Perstorps Gymnasium the third year students of the program Technical Electrician does a project. The project ends with an Escape Room-esk challenge at our facility, where they get to show their problem solving skills in the somewhat stressful inviroment.

Prices and diplomas was delivered to this years winners during the graduation dinner and we would like to congratulate Isac and Oskar on a great achievement!

Summertime is here!

As vacation is fast approaching we wish to inform you that we will be closed during week 30-31. But per usual, you can reach us at info@faac.se for urgent matters.

There are still some weeks left and we are continuing to work on placing your orders and getting the deliveries on the road, but we would like to take this opportunity to wish you all a very nice summer!
