

Open the gates and let Autumn in

Where ever we went this summer, all we could see was FAAC-products here, there and every where. All jokes aside, we all took a bunch of photos while on vacation and we would like to share them with you before we are ready to let go of the summer memories.

Now we are all back at the office and on the roads and are looking forward to a fall full of exciting projects and new installations.

Apart from lovely vacation pictures, the Swedish summer also provided first drought and then downpour. But what does it matter when our products are made to thrive in any weather?!

With fall we are also delighted to welcome our new colleagues Martin Cook and Kim Härder to our team of regional Account Managers.
